## Technical Business Intelligence Analyst

- **Contract role – upto 12 months**
- **Values-driven Financial Services organisation**
- **Opportunity to engage enterprise-wide**

## Your Organisation

Established in 1959, G&C Mutual Bank has since grown to be one of Australia's strongest member-owned financial institutions. We are a member focused, values-driven organisation where member interests are not in conflict with shareholder interests. We make responsible, ethical decisions that benefit our members and the community, and reinvest our profits to provide better products and services. Experience the G&C Mutual Bank difference – It's your bank, because you own it.

## Your Opportunity

Reporting to the CIO, and acting as an internal service provider, the Technical BI Analyst provides BI, data analytics, reporting and data warehousing solutions which enhance efficiencies and business performance across the organisation. More specifically, the role scope comprises:

- Working closely with the CIO to:
  - champion and complete our journey to transition a legacy data and BI environment to a contemporary, leading edge Enterprise Data Warehouse (EDW) capability
  - build a roadmap to gain maximum potential from the future EDW environment through development of a robust BI, analytics and reporting framework for the organisation
- Working collaboratively with business partners to understand and interpret business data needs and requirements, utilising strong end-to-end stakeholder management and communication skills
- Developing and deploying analytical models which provide flexible self-service reporting to key business stakeholders that meet their needs and requirements
- Utilising data and BI functions to perform critical analysis of financial and non-financial information to achieve improvements in performance measures
- Providing and supporting a regular schedule of dashboard reports on performance against key indicators and benchmarks
- Knowledge sharing with key business stakeholders to facilitate operational and strategic decision making, presenting risks and benefits based on sound research
- Working with the IT team and business partners as appropriate to understand and support current operational reporting and data delivery processes across the Bank as a whole, including provision of after-hours and critical support services as required
- Contributing to project development and analysis work and estimates as Subject Matter Expert on the design, build and utilisation of data and BI assets for the organisation

## Your Profile

Key to your success in this role are the following skills and attributes:

- Sound experience in software solutions development (SQL), BI and data warehousing.
- Experience in Microsoft SSIS, SRS and SSAS (preferred)
- Demonstrated ability to apply an analytical and commercial approach to decision making, and following this through to implement IT solutions based on well-researched information.
- A results-driven and collaborative IT professional, with well-developed stakeholder engagement skills.
- Strong time management skills with the capacity to adapt to and seamlessly accommodate to change as needed.
- Applying an industry best practice approach to the analysis and PM aspects of the role
- Hold relevant tertiary / technical qualifications in a related field.

## Your Benefits

We value our employees by providing:

- Discounts on financial and lifestyle products (some with qualifying period)
- A paid volunteering day each year
- Access to Employee Assistance Program

We've built a team that values service, teamwork and integrity, to go above and beyond for our members. We have a focus on performance and continuous improvement and work collaboratively to get it right. As a member of the Diversity Council of Australia, we recognise the benefits that diversity brings to our organisation. We strive toward a collaborative culture which capitalises on the diverse skills, backgrounds and experiences of our employees.
